OUTDOOR LIVING

SUNDAZE BY ALUVISION

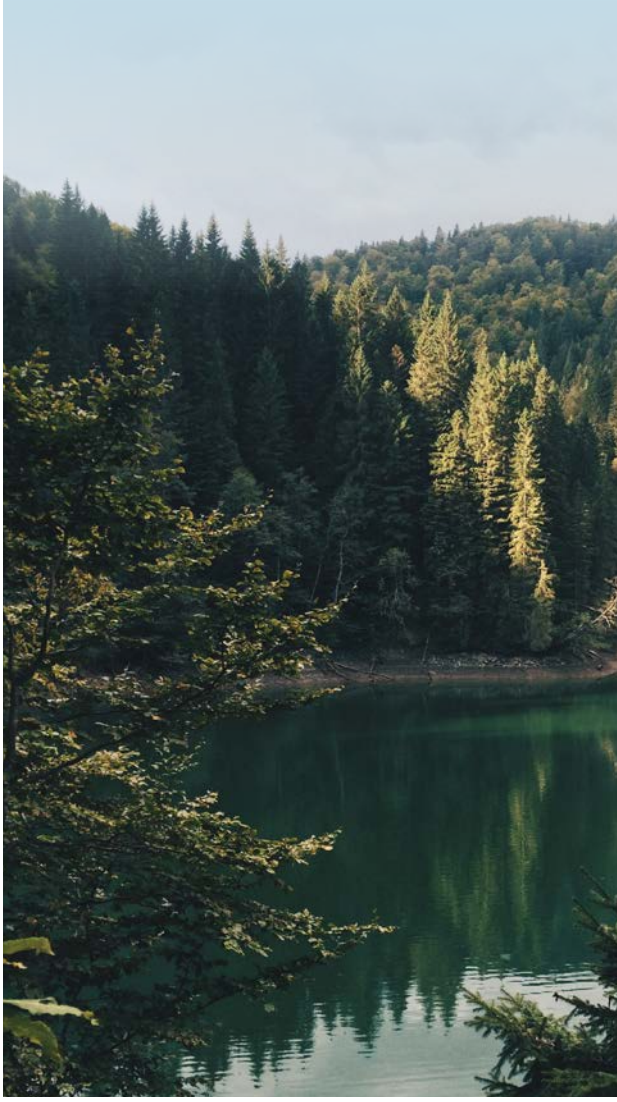

A good life is a collection of happy moments

Sundaze places carefree enjoyment centre stage. The Puro collection consists of stylish outdoor units with an eye for minimalistic design and detailed finishes. Every product is designed and produced with passion and enthusiasm by the family business Aluvision in Deinze (BE).

Customise your dream pergola design to your own taste and create that ultimate holiday feeling at home every day. Choose between a Box unit with an integrated deck, a freestanding Bay unit to mount on a terrace, or an extension model. To complete the roof, you can select a durable folding roof, stylish louvers, or even a fully closed insulated roof. Also, an extensive selection of wall elements with different types of louvered walls and shutters in wood or aluminium is available in sliding or fixed options.

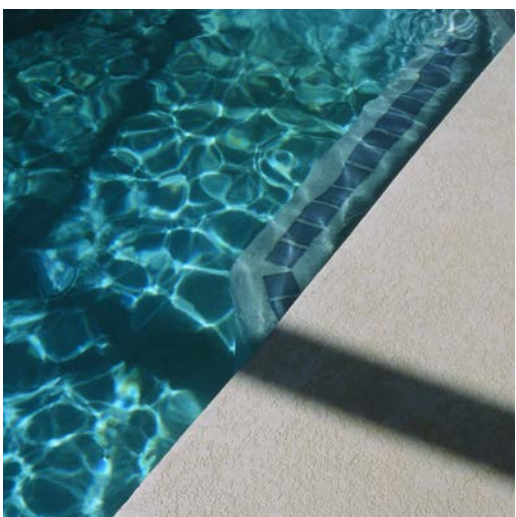

Indoor goes outdoor

Your warm, cosy indoor atmosphere can also be experienced perfectly outdoors. Choose an intimate corner in your garden and enjoy the surrounding nature. Work with natural and sustainable materials such as thermowood ayous louvers.

Live the good life

Admire Puro in its purest form. With its subtle lines and softly rounded structures this pergola is a real gem in your garden. Pleasant to enjoy and beautiful to look at. Invite friends and family and share unique moments in a beautiful setting.

Create your personal spa

Give yourself the time and space to relax. Combine a Sundaze outdoor unit with a swimming pool, jacuzzi, or hot tub, and whisk yourself away to your own wellness spa. Opt for a folding roof, and you'll be sheltered from the sun during the day, and you can blissfully enjoy a clear starry sky at night.

Your private piece of paradise

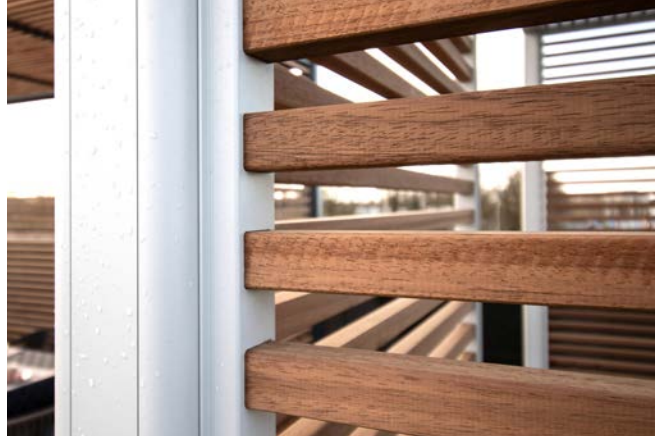

Sundaze offers the perfect solution, both for residential use and for the project market. With a Puro cabana, you can create your own private spot beside the pool, on the beach, or at the restaurant. The ultimate holiday feeling in an atmospheric setting.

We've got you covered

A Puro Bay unit with a fixed roof can also function perfectly as a carport. Constructed with insulating sandwich panels, this roof will not give you any worries about annoying noise – even during heavy rainfall. The underside can be finished with a weatherproof decorative canvas or wooden louvers. An attractive detail is that the roof element is neatly recessed within the rib structure.

Living outdoors

An attached pergola allows you to ideally extend your dining or living space outdoors. The fixed roof provides constant shelter from the sun and rain, and the louvered walls create extra privacy while you get the maximum enjoyment from your garden and surroundings.

AWARD-WINNING DESIGN

Product design driven by elegance, precision, and craftsmanship creates a unique architectural experience resulting in worldwide recognition. Sundaze's Puro collection won the 2021 German Design Award, 2021 IF Design Award, and the North American 2020 Gold Award as the most highly rated outdoor product.

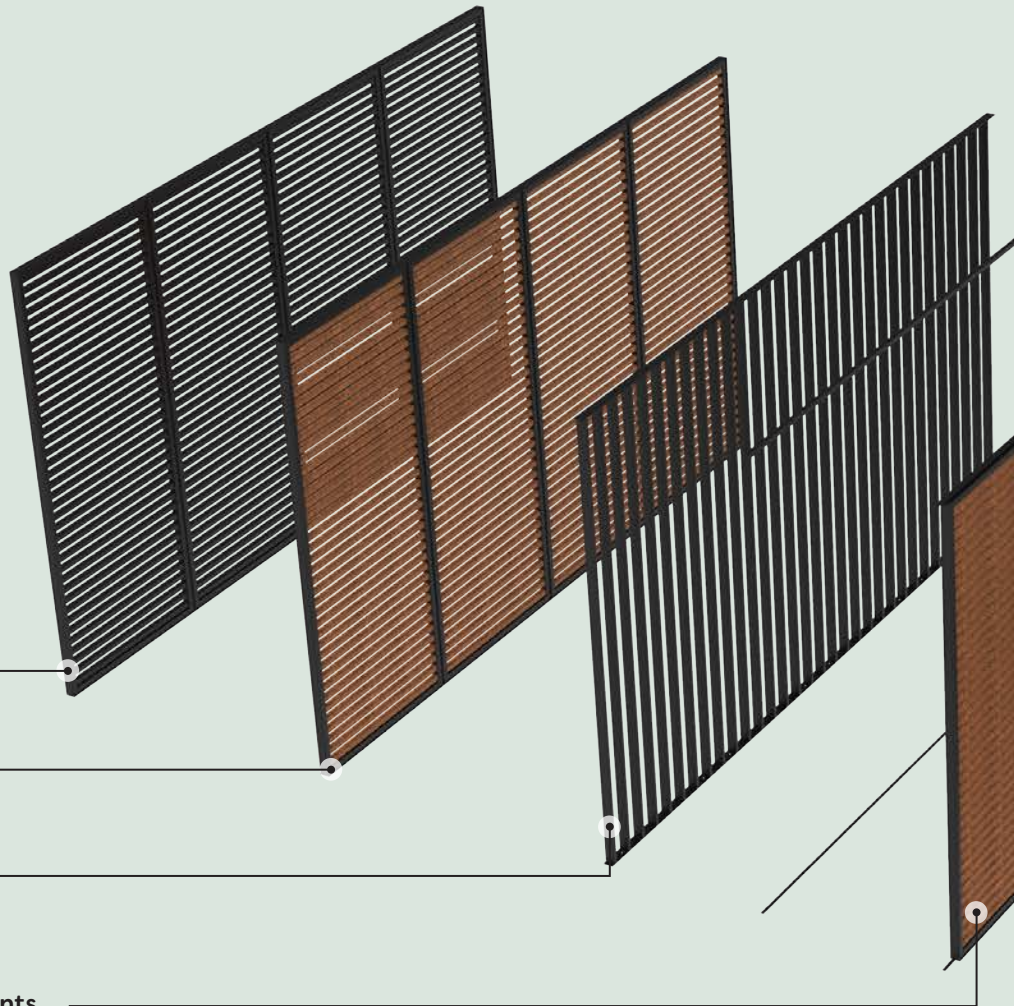

Brighten up your evenings

With the Puro Ledline, you can also put your favourite pergola in the spotlight at night. Create even more atmosphere with our Ledline. Choose between warm or cool light and decide where you want to add an extra light accent to the structure.

PURO RANGE

MIX & MATCH

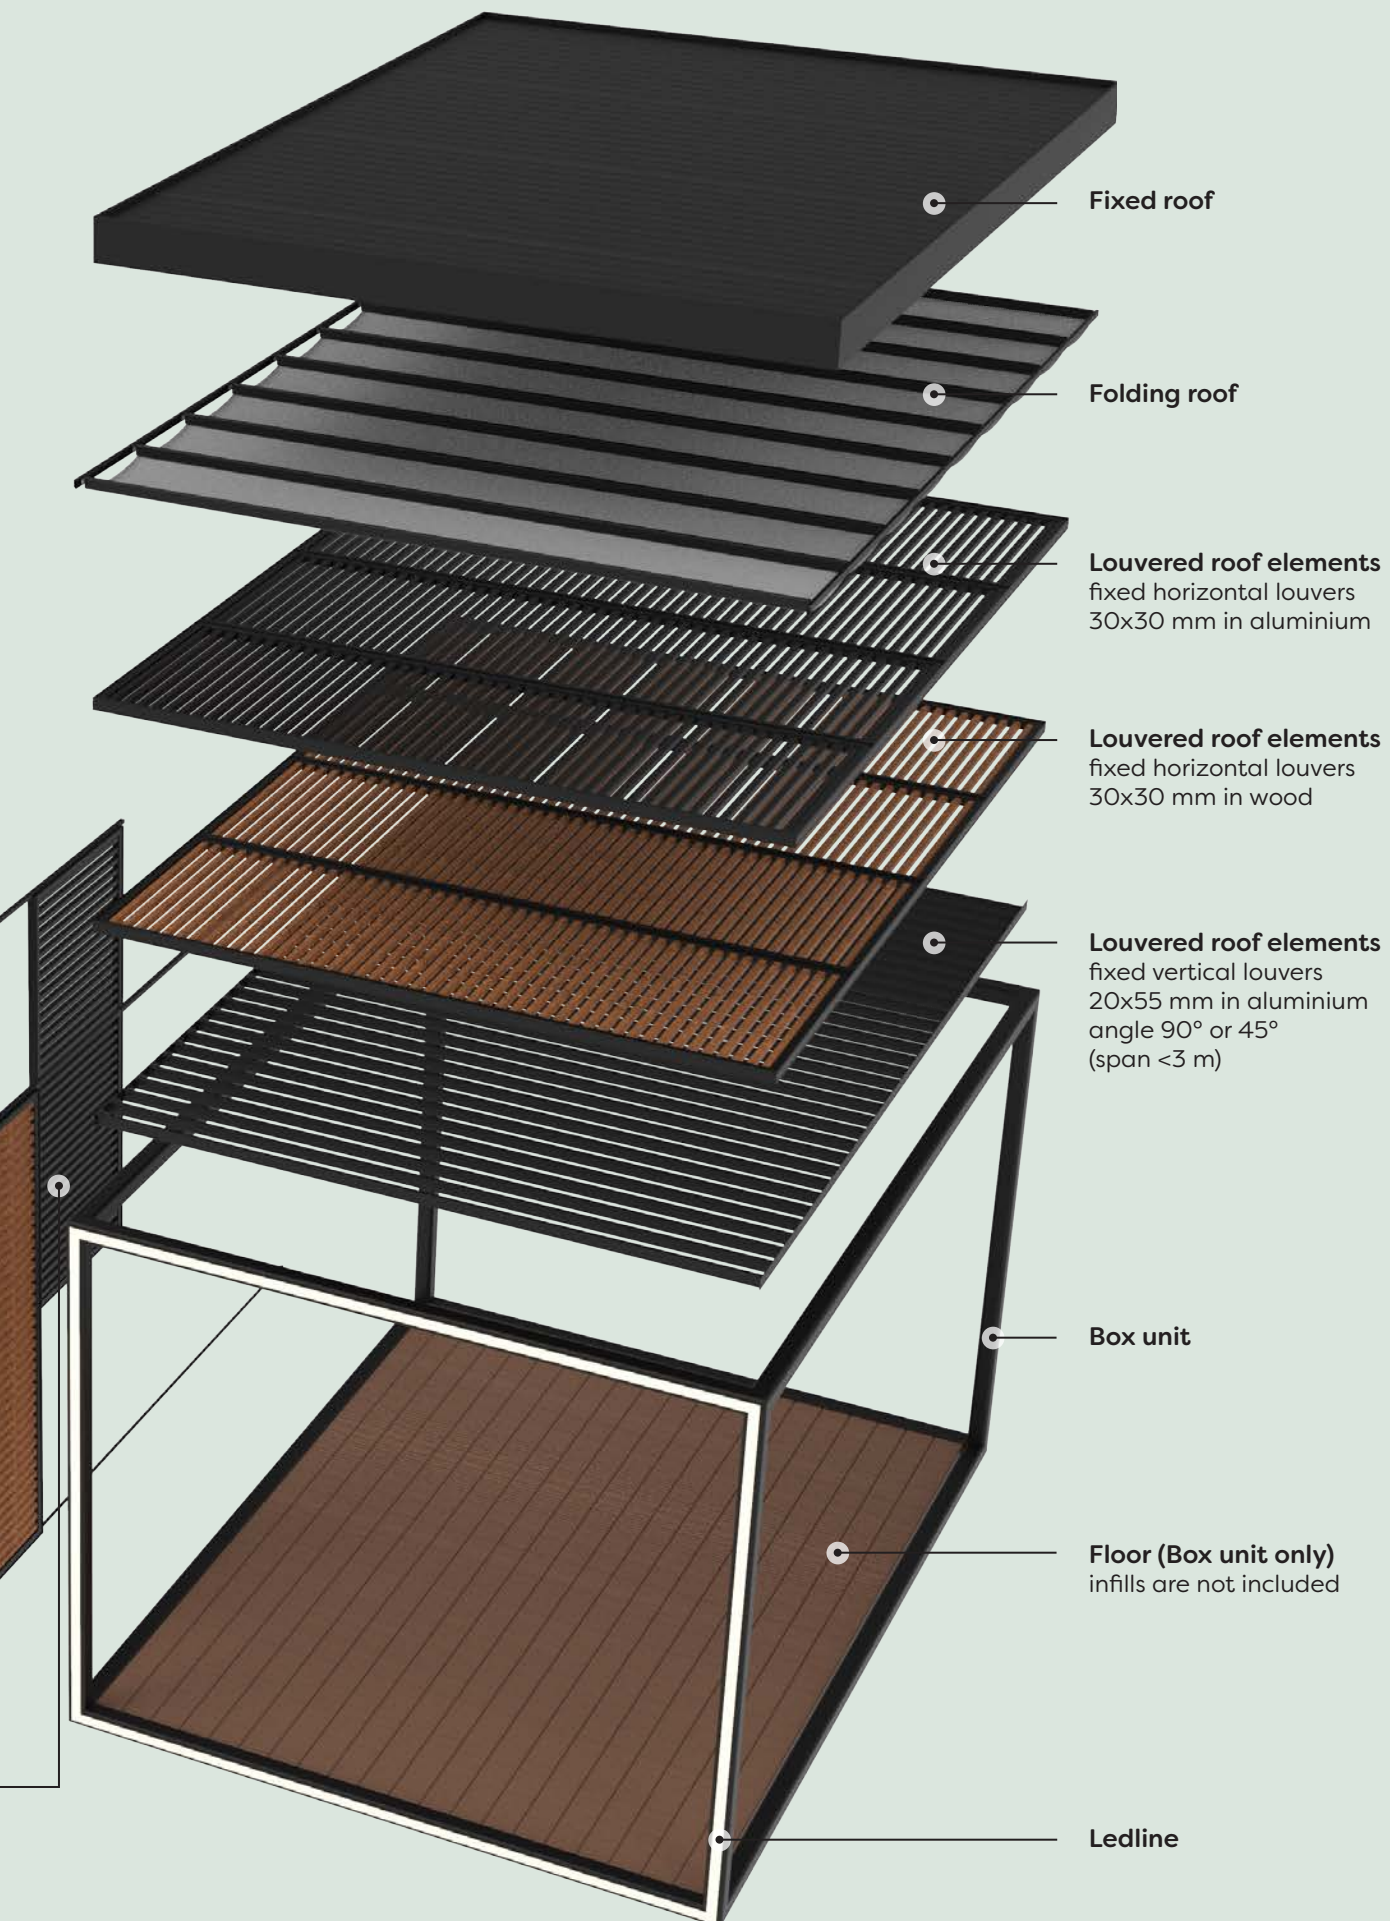

Louvered wall elements
fixed horizontal louvers
30x30 mm in aluminium

Louvered wall elements
fixed horizontal louvers
30x30 mm in wood

Louvered wall elements
fixed vertical louvers
20x55 mm in aluminium
angle 90° or 45°

Sliding louvered wall elements
fixed horizontal louvers
30x30 mm in wood

Sliding louvered wall elements
fixed horizontal louvers
30x30 mm in aluminium

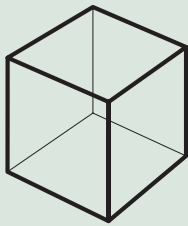

The ultimate outdoor solution for both residential and commercial use.

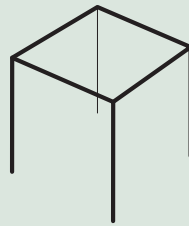

STRUCTURES

BOX UNIT

A Puro Box unit is a pergola with a basic structure consisting of 12 elegant ribs that define the complete outline of the unit. They are always beam-shaped and freestanding. The raised deck created in this way can be panelled with any finish. A Puro Box unit thus forms a beautiful architectural element that can be integrated freestanding into all environments. A Puro Box unit can be fitted with all types of roof and wall elements available in the Puro range.

BAY UNIT

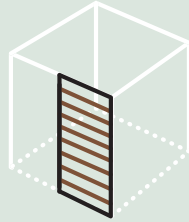

A Puro Bay unit is a pergola with a basic structure consisting of 4 horizontal ribs that demarcate the roof volume and is supported by elegant vertical support posts. These pergolas can be freestanding but can also be constructed as an extension. Ideal to install on an existing terrace. Sleek and stylish, this structure is a feast for the eyes. A Puro Bay unit can be fitted with all types of roof and wall elements available in the Puro collection.

FIXED WALL ELEMENTS

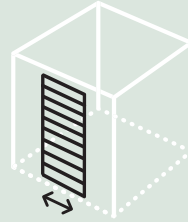

**ALUMINIUM
HORIZONTAL**

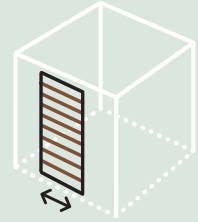

**WOOD
HORIZONTAL**

The horizontal lines give the pergola an architectural look & feel. These fixed louvers are available in wood and aluminium, or a combination of both, in a single wall element.

SLIDING WALLS

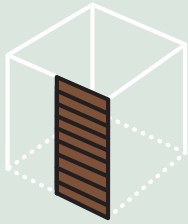

**ALUMINIUM
HORIZONTAL**

**WOOD
HORIZONTAL**

The sliding wall elements have the same design features as the fixed wall elements, with the added freedom of being able to slide them into any desired position. The Nivo guide rail also has slope compensation.

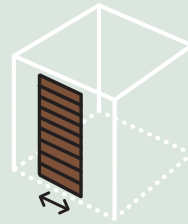

**WOODEN
SHUTTER***

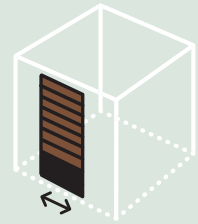

**WOODEN CLOSED
SHUTTER***

The rotating louvers provide sun protection, light wind protection, and privacy. This highly functional sidewall is available in wood, with an optional closed section.

**Available from March 2022*

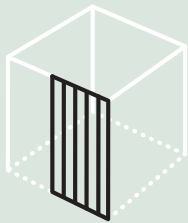

**WOODEN
SHUTTER***

**WOODEN CLOSED
SHUTTER***

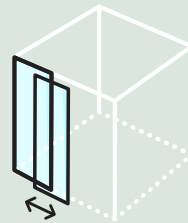

As a sliding wall, the functionality of the wooden shutter can be positioned where desired. Ground-level differences are solved with the Nivo rail guide.

**Available from March 2022*

**ALUMINIUM
VERTICAL**

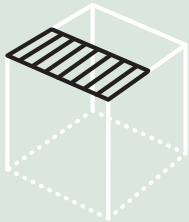

The vertical lines add a lengthening effect to the pergola. The straight orientation creates lightness, whereas the 45° orientation generates privacy.

**GLASS SLIDING
WALL**

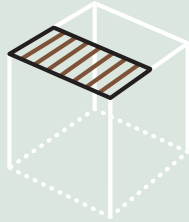

Glass sliding walls are completely transparent and offer protection from light wind and rain while allowing you to enjoy the view.

ROOF ELEMENTS

**ALUMINIUM
HORIZONTAL**

The horizontal lines give the pergola an architectural look & feel. These fixed louvers are available in wood and aluminium in a single roof element.

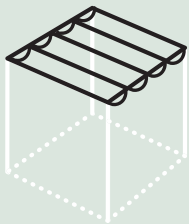

**WOOD
HORIZONTAL**

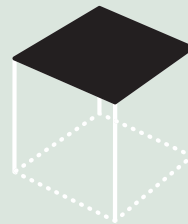

**ALUMINIUM
VERTICAL**

The elegantly rounded louver is vertically oriented and integrated framelessly into the roof. In combination with the vertical louvered wall, the lines run seamlessly from roof to wall.

FOLDING ROOF

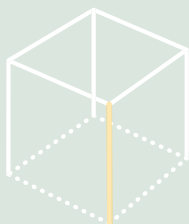

A light and elegant folding roof solution. The canvas is available in a range of colours, both UV resistant, and waterproof UV resistant.

FIXED ROOF

A robust and watertight roof with an optional canvas underside finish.

LEDLINE

The integrated Ledline is an exceptional and unique detail that gives the outdoor unit a luxurious finishing touch.
